Scale: 1 (Very poor) to 7 (Excellent)

Comments

Indicate what you liked most:

The teacher is fantastic and very enthusiastic.
 He really includes very interesting materials in the course articles etc. really good.
 Best professor ever.
 The teacher is one of the kindest person in the world!
 The teacher encourages participation and shares his experience, which is really good.
 The subject.
 Professor is very dynamic and well prepared and incites us to participate and really cativate us.
 The case as evaluation component instead of an exam was more efficient and practical, and helped to improve the students knowledge.
 Extremely important course.

Suggest any improvements:

There should have been more time between the first and the second weeks, because the work was really interesting and deserved more time!
 Classes should be shorter and more spread out (not so concentrated).
 We should have more time for the group work.
 The schedule should be more spread out.
 More classes since the subject is so interesting.
 The course was given in a bit of a rush so we didn't had enough time to well develop the group works.
 I would've liked to go more in depth in the valuation part of the course.
 The course should be given in more classes. Workgroup is very important but should be Handle in more time.
 The course should be done in more/split sessions. It was very difficult to prepare the case in only one week (this is executive!!). This course is core to the MIF and should not be done in a rush in such short sessions.

Other comments and suggestions:

Slides should be provided in pdf.
 The professor really motivate us.
